

JAKSCHE TECHNOLOGY

For over 45 years, JAKSCHE has developed and produced heavy-duty components made of reinforced plastic using high-quality materials.

“Quick access to information and ease of use allow us smooth and fast product development and monitoring at each step of the process.”

— Miroslav Stolić, Chief Operating Officer, JAKSCHE Technology

Challenge

JAKSCHE had to improve its project management including product changes, and enhance communication among its departments to meet customers' expectations of on-time delivery.

Solution

The company adopted the **3DEXPERIENCE**® platform to expedite product development processes by providing a unified and consistent product definition to achieve faster delivery and full traceability.

Benefits

The **3DEXPERIENCE** platform offers JAKSCHE a data-based approach that improves project management including engineering and development changes. The platform facilitates communication throughout the company while reducing product development costs.
